EXPERIENCE

Brainybeam Info-Tech PVT LTD
July 2023 - Aug 2023

Web Developer Intern

- Acquired practical experience and proficiency in ReactJS while   implementing Bootstrap for responsive and streamlined user interfaces.
- Took charge of utilizing ReactJS for the DentCare project, managing components, state, and interactivity within the application. Applied Bootstrap to ensure responsive design.
- Developed the DentCare project utilizing ReactJS, empowering users to effortlessly book appointments, access to hospital schedules, service details, and comprehensive doctor profiles, streamlining healthcare information accessibility.

Internpe - IT & Training Company
Jun 2023 - July 2023

Web Developer Intern

- Engaged in a Web development internship focusing on HTML, CSS, and JavaScript, involving the creation of diverse web projects .
- Crafted an interactive to-do application, allowing users to manage tasks efficiently with dynamic features.
- Developed an e-commerce landing page containing various sections and a user-friendly interface for an enhanced shopping experience.
- Created an engaging landing page for a barber shop , designed an attractive and informative interface showcasing services and establishing an online presence.

PROJECTS

Shoppy Admin Dashboard

- Engineered an admin dashboard using ReactJS and Tailwind CSS , leveraging Syncfusion components to enhance the user interface, providing functionalities allowing seamless viewing and analysis of financial details, employee, order, and customer data.
- Constructed efficient work management tools such as a calendar, Kanban boards, and diverse charts for comprehensive visualization of various data types.

Fitness Excercises

- Constructed a fitness exercise website using ReactJS , leveraging Material UI for responsive design , Utilized Exercise DB Rapid API to source exercise details .
- Implemented features enabling users to target specific muscles and choose equipment, providing detailed analysis alongside GIFs demonstrating each exercise.
- Integrated YouTube search via Rapid API to fetch and display videos demonstrating how to perform each exercise.

YouTube Clone

- Developed a YouTube clone using ReactJS and Material UI for responsive design, leveraging the YouTube v3 Rapid API for video fetching.
- Implemented a search feature enabling users to find various types of videos and integrated a sidebar with predefined sections for popular topics.
- Enabled users to watch videos and subscribe to channels directly within the application interface.
